Technical Information

effective 10/01

Description : A-596 "Freezer Grade" is a medium viscosity, **frozen food** packaging adhesive from resin tackifiers, EVA co-polymer, wax and thermal stabilizers.

A-596 is very flexible, heat stable and aggressive. It bonds well to corrugated boxes including wax or poly coated surfaces.

A-596 features low odor, light color and good heat stability in the melt tank which improves the operator environment and lowers maintenance for the glue system.

"A" series products give very dependable performance guaranteed by a modern manufacturing process and a dedicated quality assurance program.

Solids:	100%
Form:	pellets
Color	very clear, light
Application Temp:	340-360°F
Viscosity (typical):	2,800 cps @ 350°F
R & B Soft Range:	185°F

Packaging: A-596 "Freezer Grade" is packed in 12 x 12 x 16 corrugated boxes containing (50) lbs x (36) boxes = 1800 lbs or x (18) boxes = 900 lbs / pallet.

Important: Consult Material Safety Data Sheet prior to using this product.

The product contained herein meets all specifications established and in effect on the date of manufacture. No other warranty is expressed or implied, nor are additional remedies for costs or damages incurred by its use available from the manufacturer beyond the cost of the product itself. It is the sole responsibility of the purchaser to test this product and determine its suitability in its intended application. Please contact us for additional information or questions not addressed herein regarding application, special conditions or unusual requirements which could help purchaser determine suitability for intended use.
