Technical Information

effective 9/04

Description : A-925 "HMPSA" is a tacky, light color hotmelt adhesive blended from premium quality tackifiers, plasticizers, rubber block polymers and thermal stabilizers.

A-925 with a medium viscosity can be useful for securely bonding difficult materials such as coated cartons, plastic, foam, film or metal. It has an aggressive hot-tack for quick bonding and holding firm given only minimal cooling.

"A" series products give very dependable performance and are produced by a modern manufacturing process and a dedicated quality assurance program.

Solids:	100%
Form:	1 lb " bricks"
Color	clear straw
Application Temp:	325 to 350°F
Viscosity (typical):	2,500 cps @ 350°F 4,000 cps @ 325 °F
Softening range	180°F

Packaging: A-925 "HMPSA" adhesive is packed in a 24 cell FPF pour and ship pack containing (25) lbs each. There are (36) boxes = 900 lbs on each pallet.

Important: Consult Material Safety Data Sheet prior to using this product.

The product contained herein meets all specifications established and in effect on the date of manufacture. No other warranty is expressed or implied, nor are additional remedies for costs or damages incurred by its use available from the manufacturer beyond the cost of the product itself. It is the sole responsibility of the purchaser to test this product and determine its suitability in its intended application. Please contact us for additional information or questions not addressed herein regarding application, special conditions or unusual requirements which could help purchaser determine suitability for intended use.
