Technical Information

effective 07/04

Description : A-999 "Foam Assembly" is a medium viscosity "swirl spray" hotmelt adhesive blended from premium quality tackifiers, polymers, plasticizers and thermal stabilizers.

A-999 is a slow set, flexible hotmelt adhesive for bonding polyurethane, polyethylene, latex and other foams for mattresses. This product will slowly harden to reduce "noise" associated with a pressure sensitive hotmelt. A-999 also develops good green strength to permit handling of foam pieces with a minimum of cooling time.

"A" series products give very dependable performance guaranteed by a modern quality assurance and manufacturing process.

Solids:	100%
Form:	small dusted pellets
Color	amber
Bulk Density:	5 lbs / gal
Application Temp:	350°F
Viscosity (typical):	2000 cps @ 350°F 3000 cps @ 325 °F
Softening Range:	180°F

Packaging: A-999 "Foam Assembly" is packed in heavy duty corrugated boxes containing (50) lbs each x (36) boxes = 1,800 lbs / pallet.

Important: Consult Material Safety Data Sheet prior to using this product.

The product contained herein meets all specifications established and in effect on the date of manufacture. No other warranty is expressed or implied, nor are additional remedies for costs or damages incurred by its use available from the manufacturer beyond the cost of the product itself. It is the sole responsibility of the purchaser to test this product and determine its suitability in its intended application. Please contact us for additional information or questions not addressed herein regarding application, special conditions or unusual requirements which could help purchaser determine suitability for intended use.
